Senior Data Engineer with 6+ years of experience designing and scaling data pipelines, automating workflows, and deploying ML/NLP models. Skilled in Spark, Palantir Foundry, Airflow, and AWS, with a strong track record of enabling accurate KPI reporting, improving data reliability, and mentoring teams to deliver production-grade solutions.

EXPERIENCE

Sr. Data Engineer | Circana (Bengaluru, Karnataka) | January 2024 – Present

- Developed NLP model to classify new products into market structure categories, reducing manual coding effort and supporting timely generation of sales KPIs. (Python, PySpark, Scikit-Learn, Optuna)
- Built and maintained scalable data pipelines to integrate UPCs and impression data from clients with internal datasets, enabling accurate reporting of key KPIs such as sales, buyers, and trips. (Python, Spark, Hive, PostgreSQL, AWS S3)
- Automated deployment workflows using Jenkins, ensuring adherence to CI/CD principles and improving code delivery efficiency.
- Migrated Hive workloads to PySpark and scheduled them with Airflow, improving maintainability and aligning with modern data engineering practices.
- Mentored a team of four junior developers, providing technical guidance, code reviews, and hands-on support to resolve blockers and accelerate delivery.

Data Engineer | Swiss Re (Bengaluru, Karnataka) | February 2021 – January 2024

- Automated entity resolution by clustering insured and broker company names using Jaccard distance, improving consistency in downstream reporting. (Python, PySpark, Palantir Foundry)
- Optimized legacy R data pipelines by refactoring SQL and parallelizing workloads, resulting in faster processing and improved reliability. (R, SQL, PySpark)
- Developed automated reports and email alerts for data quality health scores in datasets used by our internal CRM, enabling proactive monitoring and issue resolution. (Python, PySpark, Palantir Foundry)
- Automated RFM analysis to assess customer and broker health scores across KPIs such as premium, profitability, cross-selling, and claims, supporting strategic decision-making. (Python, PySpark, Palantir Foundry)
- Built ML model to classify NPS responses into predefined categories, enabling structured insights from customer feedback. (SparkML, PySpark)

Data Engineer - 1 | Nissan Digital (Trivandrum, Kerala) | July 2019 - February 2021

- Developed ETL scripts for tools supporting inventory optimization and vehicle volume estimation, applying statistical methods and Python-based orchestration. (Python, Prefect, SQLAlchemy, AWS)
- Built reusable modules for AWS services (S3, RDS, Batch), streamlining integration and reducing code duplication across teams. (AWS, Docker)

TECHNICAL SKILLS

- Programming:** Python, Golang, Bash scripting
- Big Data & Data Processing:** Apache Spark, PySpark, Hadoop, Hive, Pandas, Polars
- Databases:** SQL, PostgreSQL, Oracle, SQL Server, Google BigQuery
- Cloud & DevOps:** AWS (S3, Lambda, EC2, Batch), Azure, GCP, Jenkins, Docker
- Data Engineering & ML Tools:** Apache Airflow, Scikit-Learn, Palantir Foundry

ACHIEVEMENTS

- Special recognition for optimizing R scripts (Swiss Re Triannual Awards)
- Spotlight award for project contribution (Nissan Digital)
- Finalist in 7th CSI In-App National Project Awards

EDUCATION

B.Tech, Computer Science KIIT University, Bhubaneswar, Odisha CGPA: 8.9 | 2015-2019

CERTIFICATIONS

Certified Palantir Foundry Data Engineer Professional Palantir | 2023
