

UJJAWAL SINHA

Senior Data Engineer

+91 7873878103

ujjawsinhacool16021998@gmail.com

LinkedIn GitHub

Technical Skills

- **Programming:** Python, Golang, Bash
- **Big Data:** Spark, PySpark, Hadoop, Hive, Pandas, Polars
- **Databases:** PostgreSQL, Oracle, SQL Server, BigQuery
- **Cloud/DevOps:** AWS (S3, Lambda, EC2, Batch), Azure, GCP, Jenkins, Docker
- **Data Eng. & ML Tools:** Airflow, Scikit-Learn, Palantir Foundry

Certifications

Palantir Foundry Data Engineer Professional Palantir | 2023

Achievements

- Recognition for optimizing R scripts (Swiss Re Triannual Awards)
- Spotlight award for project contribution (Nissan Digital)
- Finalist – 7th CSI In-App National Project Awards

Education

B.Tech – Computer Science KIIT University, Bhubaneswar | 2015–2019
CGPA: 8.9

Profile

Senior Data Engineer with 6+ years' experience in building scalable pipelines, automating workflows, and deploying ML/NLP solutions. Skilled in Spark, Foundry, Airflow, and AWS, with proven impact on KPI reporting, data reliability, and team mentoring.

Experience

Data Scientist I Fractal Analytics (Bengaluru)

Oct 2025 - Present

- Working as an AI Engineer on the Cogentiq Platform. Worked on creating backend APIs with fastapi, SQLAlchemy for the ORM, alembic for database migrations. Also, worked on crewai, langfuse and codegen. Primarily using Azure Cloud for deploying Webapps in Docker containers.

Sr. Data Engineer I Circana (Bengaluru)

Jan 2024 – Oct 2025

- Built NLP model to classify new products into market structure categories, reducing manual coding effort and supporting timely KPI generation. (*Python, PySpark, Scikit-Learn, Optuna*)
- Integrated UPCs and impression data with internal datasets to enable accurate sales/buyer/trip KPIs. (*Python, Spark, Hive, PostgreSQL, AWS S3*)
- Automated deployments with Jenkins, ensuring CI/CD compliance and faster delivery.
- Migrated Hive workloads to PySpark + Airflow, improving maintainability and modernizing pipelines.
- Mentored 4 junior developers via code reviews, guidance, and blocker resolution.

Data Engineer I Swiss Re (Bengaluru)

Feb 2021 – Jan 2024

- Automated entity resolution using Jaccard distance to cluster company names, improving reporting consistency. (*Python, PySpark, Foundry*)
- Refactored SQL + parallelized workloads, optimizing legacy R pipelines for speed and reliability. (*R, SQL, PySpark*)
- Built automated reports + email alerts for CRM data quality health scores. (*Python, PySpark, Foundry*)
- Automated RFM analysis (premium, profitability, cross-selling, claims) for customer/broker health scoring.
- Trained ML model to classify NPS responses into structured categories. (*SparkML, PySpark*)

Data Engineer 1 I Nissan Digital (Trivandrum)

Jul 2019 – Feb 2021

- Developed ETL scripts for inventory optimization & vehicle volume estimation. (*Python, Prefect, SQLAlchemy, AWS Services like Lambda, S3, Aurora, ECS*)
